

March 2026.

The upcoming elections of The Transplantation Society represent an important opportunity for its global membership to actively contribute to its future direction and governance.

As a truly international organisation, TTS relies on the engagement and participation of its members to ensure that its leadership reflects the diversity, priorities, and evolving needs of the global donation and transplant community.

Over the years, I've learned that voting gives members with a direct mechanism to support individuals who demonstrate the experience, vision, and commitment necessary to advance donation and transplantation science, clinical practice, education, and ethical standards worldwide.

As a candidate, I would like to suggest that all members to review all the candidates' profile at the TTS official webpage and participate in the election process.

A strong voter turnout is essential to ensure that the Society continues to evolve in alignment with its mission, the visions of its international membership, and to satisfy the interests and needs of all regions and disciplines.

Sincerely

CS Scanned with CamScanner

**Prof. Gabriel E. Gondolesi, MD**  
Current TTS Vice-President.  
*Candidate for President-Elect.*
